

Matrix Transpose Operation: $B[i][j] += A[j][i]; A[j][i] += 1.0$

Code Operation:

```
for i in range(order):  
    for j in range(order):  
        B[i][j] += A[j][i]  
        A[j][i] += 1.0
```

- Read from $A[j][i]$ (transpose)
- Add to $B[i][j]$ (normal order)
- Increment $A[j][i]$ by 1.0
